

Manufacturer's Certification For Compliance with the American Recovery and Reinvestment Tax Act of 2009

Purpose of This Document

This Certification Document is intended to provide consumers installing Gila® window films with information regarding product qualification for federal tax credits under the American Recovery and Reinvestment Tax Act of 2009 (ARRA) for energy efficiency purposes.

Name and Address of Manufacturer

CPFilms, Inc.
4210 The Great Road
Fieldale, Virginia 24089
(276) 627-3000
www.cpfilms.com

Identification of Component

Gila® solar-control window films - used as an insulation material or system primarily designed to reduce heat loss or heat gain in a home.

Components Qualifying for Federal Tax Credits under the ARRA.

See page 4 for a list of Gila solar-control window films that qualify as Eligible Building Envelope Components for various window, skylight, and door glass types and climate zones.

Instructions

1. For each existing window, skylight, or door under consideration, identify the glass type as either: (a) Single Pane Clear or Tinted, (b) Dual Pane Clear or Tinted, (c) Dual Pane Low-e Clear or Tinted, or (d) Dual Pane Solar-Control Low-E Clear or Tinted.

If you have dual pane windows and are unsure whether your windows are type (b), (c) or (d):

For Climate Zones 4-8, **it is the homeowner's responsibility** to ensure that the window is "Dual Pane Solar-Control Low-e" to obtain the tax credit. The recommended method to ensure this is to have documentation from your builder or remodeler that installed the windows. This type of window will have a Solar Heat Gain Coefficient (SHGC) of 0.40 or less, and a U-value of 0.35 or less. Your builder or remodeler should have documentation, such as NFRC Labels, which indicate the SHGC and U-value of the windows they install. This type of window has only been available since early 1990s.

2. Determine your climate zone from the map on page 3. If you have questions about your climate zone, see the list of climate zones by state/county listed at www.windowfilmtaxcredit.com
3. Use the table on page 4 to determine qualifying products for the combination of window type and climate zones determined above.

Other Notes

1. Qualifying products can only be applied to windows, skylights, or door windows with wood or vinyl frames only. Windows with aluminum frames do not qualify.
2. Dual Pane Clear or Tinted includes single pane glass with an interior or exterior storm pane of glass. Again, entire window and storm window must be composed of wood or vinyl frames, no metal frames allowed.
3. The presence or absence of dividers, screens, exterior or interior shading devices (blinds, shades, curtains, etc.), shading from trees, bushes, adjacent buildings or homes, etc. or shading from overhangs does not affect qualification status.
4. The compass orientation of windows, doors, or skylights also does not affect qualification status.
5. Please check back on this site (www.windowfilmtaxcredit.com) periodically for new qualifying product updates and on the links that may be accessed from this site for tax credit updates.
6. The inclusion of Gila products on the tables herein does not imply any warranties. Please see the warranty documentation provided at time of purchase, or alternatively contact the manufacturer, for complete warranty information.
7. Failure to install products in accordance with the manufacturer's instructions may result in loss of eligibility for the tax credit.

Under penalty of perjury, I declare that I have examined this certification, and to the best of my knowledge and belief, the facts are true, correct, and complete.
