To Whom It May Concern:

AtlanTech Tower is 12-story, 413,426 square foot building in Fort Lauderdale, Florida that has approximately 42,000 square feet of window line which requires film.

In 2004 International Energy Savers installed R20 SR CDF Silver Llummar window film in our entire building. In order to install the new window film, they first needed to remove the old film that was on the windows. The removal of the old film was an onerous task which they performed with a minimum disruption to our tenants. The installation of the new film was done professionally and any issues (all of which were minor) were resolved immediately.

We continue to use IES for any window film replacement required at AtlanTech and would highly recommend them for your window film project.

Please feel free to contact me with any questions at 954.771.1175.

Sincerely,

Crimson Services, LLC
as agent for New Boston AtlanTech LP
