To Whom It May Concern:

It is with pleasure that we recommend IES. We have utilized the services of IES in several locations over the past ten years. Each project requirements were different and unique to their location. In all of the cases listed below, we found their recommendations, service, professionalism and commitment to the job commendable.

1. The Homosassa Riverside Resort condominium hotel units located on Cherokee Way, Homosassa, FL - IES installed film for all 75 hotel rooms and suite windows and doors in 2005 and 2006.
2. The Homosassa Buffet House restaurant at the State Wildlife Park on U.S. 19 in Homosassa, FL - IES installed energy efficient reflective film for the entire glass enclosed upstairs restaurant and kitchen in 2004.
3. The Yardarm Lounge located in Homosassa, FL - IES installed film for the entire waterfront floor to ceiling glass 180 seat bar to reduce heat and sun exposure in 2000. They reinstalled with a mirrored film again in 2006 after major renovations.
4. The Riverside Crab House located in Homosassa, FL - IES installed film for the glass enclosed waterfront restaurant in 2007
5. Our personal waterfront residence located on Halls River Rd, Homosassa, FL - IES installed film on all waterfront glass doors and windows to help reduce heat and glare.

While I can't verify the total square footage and type of film applied in each of the above cases without doing additional research, I can assure you the amounts were significant and that we most certainly will contract with IES for any future film needs.

Sincerely,

Gail G. Oakes, Managing Member
Riverside, LLC
